

Wisam Damouny

Software Technical Leader · AI & Data Integration · Teaching / Consulting / Product Leadership

Shefa-Amr, Israel · +972-50-8855014 · wisam.damouny@gmail.com

OBJECTIVE

Passionate and experienced Software Technical Leader with a strong foundation in AI, data integration, and systems programming. Seeking opportunities to contribute through teaching, consulting, or product leadership, bridging real-world technology with human-centered applications. Focused on combining hands-on engineering with strategic thinking to drive forward-looking solutions in education, AI, and enterprise software.

EXPERIENCE

2020 – Present · Founder & AI / SaaS Developer

Independent

- Founded and led multiple AI-powered SaaS initiatives focused on education, productivity, and automation.
- Designed and deployed full-stack, multilingual web applications.
- Applied LLMs for task automation, content generation, and intelligent interfaces.
- Integrated technologies like Supabase, React, Node.js, and vector databases.
- Managed product design and early-stage validation with real-world users.

10/2019 – Present · Software Technical Lead · Qlik

SAP data integration / AI diagnostics / Mentoring

- Leading advanced SAP data-integration tools: performance, scalability, enterprise data modeling.
- Integrating AI-driven performance diagnostics and exploring autonomous task planning for replication pipelines.
- Mentoring engineers; initiated internal LLM/automation research.
- Improved project delivery time by 20% and data integration coverage by 60%.

7/2017 – 10/2019 · Senior Software Engineer · Attunity (Galil Software)

SAP HANA Replicate

- Led the SAP HANA Replicate endpoint, contributing to a 70% increase in product performance.
- Mentored junior engineers, raising team skill levels by 50%; cross-team efficiency +30%.

6/2015 – 6/2017 · Software Engineer · Qognify (Galil Software)

NICE Vision NVR

- Contributed to the NICE Vision Real-Time NVR connectors in C++/C#; multithreading and network protocols.

12/2013 – 6/2015 · QA Automation Engineer · Nice Systems (Galil Software)

Automation & test engineering

- Designed automation solutions and led testing for complex systems in Java and JavaScript; built reports and dashboards.

EDUCATION

B.Sc. Electrical Engineering (Computer Engineering) · TU Darmstadt, Germany

2009 – 2013 · GPA 84 (German 2.7)

- Focus on Computer Engineering.

Bagrut Certificate · Greek Catholic School, Shefa-Amr, Israel

2003 – 2006 · Majors: Math, Physics, Computer Science

- Excellence Award – Israeli Ministry of Education.

SKILLS

AI & ML: prompt engineering, on-prem LLMs, NLP, LangChain, RAG workflows

Programming: C/C++, Java, Python, JavaScript, React, NodeJS

Systems & Data: SAP HANA, Qlik Replicate, data pipelines, streaming architectures

Automation & Testing: AI-enhanced test frameworks, CI/CD, cloud-native deployment

Languages: English, Hebrew, Arabic, German

Teaching & Mentorship: team mentoring, educational app development, technical training

COMMUNITY & ACTIVITIES

- Delivered internal workshops on AI-driven automation and workflow optimization at Qlik.
- Active STEM mentor and community volunteer since 2004; led social-responsibility projects.
- Developed AI-powered reading tools for children (Arabic/Hebrew).
- Interests: AI & Technology, Painting, Traveling, Classical Music.
